### Distinct service advantages make your Busway installation "hassle-free"

- Missing Link program guarantees shipment in a maximum of 5 working days of a small quantity
  of indoor feeder straight lengths and fittings. Orders for outdoor busway or for international
  destinations may require 2 extra days for processing.
- Measurement Services are offered for your critical and complex projects. Schneider Electric
  will assist with field measurement and assume responsibility for the layout and exact fit of all
  components. Contact your local Schneider Electric sales office for exact details.
- Emergency Service; we are on call 24 hours a day, 7 days a week, 365 days a year. For emergencies, call 1-888-SquareD (1-888-778-2733).
- New! Quick Ship program provides product availability for time sensitive orders. The program is available through the product selectors and offers a limited selection of I-Line busway footage and fittings. Contact your local Schneider Electric sales office for exact details.

Class 5600 / Refer to Catalog 5600CT0201

by Schneider Electric

www.schneider-electric.us

Powerbus 225 construction consists of a light-weight electrical grade all-aluminum housing with silver-plated copper conductor bars for maximum electrical efficiency. The total product offering includes straight sections, fittings, accessories, and plug-in units for a total installation. This new busway is available in two power ratings: 225 A (240 V) and 100 A (600 V).

#### 100 Ampere-600 Volt maximum

100 ampere Powerbus busway offers the same features as the Powerbus 225 making it the best choice for smaller retail and commercial applications. A full complement of fittings and accessories allows the designer/user to quickly and simply provide the best power distribution solution at lower ampacity ratings. (50% integral ground standard.)

Type 3

#### **Busbar Configuration Code**

Powerbus plug-in units are rated maximum 100 ampere. The basic unit is a tap box rated IP54 Standard; three other styles are offered with provisions to accept various circuit breakers and receptacles. All units are supplied

with ingress/dust and moisture protection of IP40. An optional kit is available for FA and QO units to raise the protection to IP54. This kit will also raise the QOR unit to moisture protection of IPX3.

### Pricing Instructions For "Factory Assembled" Busway Systems (or Components)

#### Standard Straight Lengths

The basic component of a busway system is a straight section with a "joint pak" factory-affixed to one end. Plug-in busway is available in standard lengths of 4, 6, 8 and 10 feet. Feeder busway is available in lengths from 16" to 120" in increments

#### Riser Busway

We also offer a "Riser" Plug-In busway with openings on one side only for riser installations. This busway offers the same short circuit ratings as our standard plug-in busway.

#### Indoor Drip Resistant and IP54 Splash Resistant Busway

These water resistant features are available as an option for indoor plug-in and feeder busway. Price the drip resistant busway using the appropriate per foot price. Price the IP54 splash resistant busway using the outdoor per foot price.

#### Outdoor Construction (Feeder Busway Only)

Besides the additional charge for outdoor busway, you must also add a charge for a weather seal if the busway passes through a building wall or roof from an interior to an exterior space (found under Miscellaneous Additions and Accessories on page 12-8). Please indicate the thickness of the wall, roof or floor when entering order. Add the "labor only" price for fittings and special features per general pricing instruction.

#### **High Short Circuit Bracing**

I-Line busway is available with either standard short circuit bracing or high short circuit bracing. The table on page 12-8 lists maximum short circuit ratings for each busway type and rating.

## General Pricing Instructions

- Prepare a layout sketch of the busway run showing:
  - All dimensions in feet and inches
  - All wall and floor locations and thicknesses
  - All fittings (use top of page 12-7 as checklist)
- Add all dimensions together. Round up to the next foot.
- Multiply this total by the appropriate price per foot according to the tables above.
- To this, add the "labor only" charges for all fittings from page 12-7.
- Add hangers per page 12-8 (quantities explained below)
- Add for any other unit price items such as end closures, wall flanges, or special lug requirements from page 12-8.

Hangers for the I-Line II busway should be priced from the table on page 12-8. Indoor horizontal busway requires one hanger for every 10 feet of busway. Vertical indoor busway requires one hanger for every 16 feet. Outdoor feeder busway requires one hanger for every 5 feet in either vertical or horizontal mounting.

The elbow "labor only" charge applies to all types of 90° elbows within a particular rating of busway. The charge does not include any busway footage (i.e. a charge for the appropriate amount of busway footage would have to be added to the "labor only" charge to obtain a "complete device" charge). If elbow is other than 90°, double the labor only charge.

The labor charge for tees shown in Table 12.25 on page 7 applies to all factory assembled types of 90° tee fittings within a given rating. Dimensions and catalog number suffix of flatwise tee fittings will be found in the Class 5600 Manual. Refer to factory for edgewise tee dimensions. Crosses are also available.

#### **Indoor Tap Boxes**

Feeder cable tap boxes are used at the end (-ETBMB) or center (-CTB) of a busway run and incorporate a short section of busway into their construction. See Catalog Class 5600 for the length of the tap box then add the "labor only" charges shown above to complete the price.

Plug-in cable tap boxes are plugged into the side of the busway (at any opening except the very last opening of a run). The price shown in the table on page 12-5 is the complete device price. No "labor only" charge is required.

Lugs other than standard mechanical lugs may be selected from the table on page 12-8.

#### **Service Heads**

Service heads are of outdoor construction and include Square D<sup>®</sup> brand standard lugs. Price footage to end of busway run including dimension of service head. Add service head labor charge.

#### Unfused Reducer

Unfused reducers are used to reduce from a higher amperage busway to a lower amperage. Price each rating of busway to the centerline of reducer and include the "labor only" price of the higher rating.

**NOTE:** The National Electric Code does not allow the use of unfused reducers in vertical riser installations. Refer to the NEC for restrictions in industrial installations.

### **Fused or Circuit Breaker Cubicle**

These are used as in-line overcurrent protection devices. They can be used in conjunction with an unfused reducer to offer a device which reduces a run of busway in ampacity and offers overcurrent protection.

#### I-Line to I-Line II Adapter

This adapter is used to join I-Line II busway (800 A–5000 A) to existing installations of original I-Line busway. If connecting to an existing "slot end" of original I-Line, use a "bolt end" adapter (-12B), and vice versa. Price as four feet of busway for 800 through 5000 A busway.

#### **Expansion Fittings**

Expansion fitting labor only charge does not include busway footage. The expansion fitting is built into a 3 ft. -4 in. straight length for 800 A–5000 A and a 5 feet -0 inch straight length for 225 A–600 A. Limit of expansion or contraction is  $\pm 1$ -1/2 inches. Not available in outdoor construction.

#### **Bussed Transformer Connection**

A bussed transformer connection is used when the busway physically attaches (other than cable) to a three phase transformer. Price busway footage to the edge of transformer L.V. or H.V. terminal. To this, add labor only charge for a "bussed transformer connection." For power company vault termination charges, consult the factory.

#### **Transformer Taps**

Transformer taps are used to make cable connection to transformers. Calculate footage price to end of busway. Use standard dimensions. Price of taps includes lugs; if lugs other than standard Square D brand lugs are required, add charges from page 12-8. Note that taps need **NOT** be located directly above transformers for cable connections.

#### **Finger Protection to IP2X**

This feature provides improved protection from accidental contact with live parts during insertion and removal of plug-in units. This feature meets the IP2X rating as defined by IEC529 standard. (Pricing on page 12-8.)

#### Connection to Competitive Busway

Consult your nearest Schneider Electric sales office.

#### **Miscellaneous Additions and Accessories**

#### Table 12.26: Additions and Accessories

				\$ Price
				\$ Price
Integral Weather Seal Vapor Barrier (Required when busway passes through an exterior wall or roof)				764.00
Roof Collar (Required when busway penetrates an exterior roof)				870.00
Roof Flange Kit				
(Optional when busway penetrates an exterior roof)				2346.00
Hanger, Horizontal Flatwise and Edgewise (See "Table 12.23: Accessories" on page 5.)				64.00

• 3000 A through 4000 A	•	2500 A through 5000 A	HFVS8	292.00
Lugs – Other than Square D Standard			each lug	70.00
Lugs – Square D Standard added to flanged end			each lug	70.00
Sway Brace Collar HP1SBC				82.00
Assembly Tool AT2				N/C
Finger Protection to IP2X (For each plug-in opening) Plug-in Busway only			per foot	17.00

Note: Finger protection can be ordered on I-Line II (800–5000 A) plug-in busway only.

### **Electrical Data for I-Line II Busway**

Standards:	UL857 (File Number E22182); CSA C22.2 No. 27-1994 (File Number LL-61778); IEC 439 Part 2
Systems:	AC–3Ø3W, 3Ø4W, 1Ø2W, 1Ø3W. DC–2-pole. All neutrals are 100% capacity.
Voltage:	600 volts AC/DC, 50 Hz and 60 Hz
Integral Ground:	50% capacity as standard for 800 A to 5000 A, as an option on 225 A to 600 A
Enclosure:	Indoor, indoor drip resistant and outdoor (indoor drip resistant and outdoor are available in I-Line II [800–5000 A] busway only)

Class J Fuses – Provisions for installing Class J fuses are included in 30 through 600 A fusible devices. Conversion to Class J fuse spacing requires relocating the load side fuse base assembly from standard Class H fuse location to an alternate position in the enclosure.

- For use on vertical riser applications only.
- For vertical riser applications order auxiliary mounting kit—Catalog Number PBQ4060RMK. (Price \$300.)
  This device uses bolt-on connection. It may be used only on plug-in busway with same number of poles. Add suffix (H) for horizontal applications and suffix (V) for vertical applications. Not for use on 800 A copper busway.
  For the PQ and PS units, add "M54" suffix for IP54 splash resistant construction. IP54 price adder is 15%.

## Table 12.29: Class R Fuse Kits

Switch Size (A)	Voltage Rating	Kit ▼ Catalog No.	\$ Price
30	250 V△ 600 V△	QMB30R QMB36R	31.20 32.60

Solid state trip circuit breakers are supplied with -LSI (long time, short time, instantaneous pickup) adjustable trip unit functions unless otherwise required. Adjust prices accordingly (see circuit breakers, section 7) if ground fault protection, neutral current transformer, 100% rated circuit breaker or alternate trip unit functions are required.

- The ET 1.0 trip unit cannot be field replaced or have the long-time trip point setting adjusted.
- All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. Add suffix (H) for horizontal applications and (V) for vertical applications.

For IP54 splash resistant construcation, add "M54" suffix. IP54 price adder is 15%.

- The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See the chart on pge 7-45 for rating plug catalog suffix letters.

  All these devices use bolt-on connection. It may be used only on busway with the same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an (H) for horizontal applications and (V) for vertical applications.

  Listed catalog numbers are for 80% rated circuit breakers. For 100 % rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with standard L1 trip functions at 800 A 33W for a horizonatal application wold be PTPG36080GHCU31A.

For IP54 splash resistant construcation, add "M54" suffix. IP54 price adder is 15%.

The 250 A is available as a special device. Contact your local Schneider Electric field office for ordering information.

Note: For IP54 splash resistant construction, add an "M54" suffix. The IP54 price adder is 15%.

PE7

The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See the ratings plugs table on page 7-44 for rating plug catalog suffix letters.

All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an (H) for horizontal applications and (V) for vertical applications. Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with L1 trip functions at 800 A 30/30 W for a horizontal application would be PTRG36080GHCU31A.

Special device. Contact your local Schneider Electric field office for ordering information.

- Non-segregated phase bus
- 600 V through 15 kV (1200 A–4000 A)
- Aluminum, steel or stainless steel housing
- Aluminum or copper bus bars
- Insulated with fluidized bed epoxy (5 kV–15 kV)
- Complete line of fittings provides for any configuration
- Indoor trapeze and outdoor column supports
- For use in utilities, industrial and commercial facilities

Power-Zone bus is custom designed, manufactured and tested per ANSI C37.23 standards to meet customer specifications. The 600 V product is also UL Listed. It is a completely coordinated package of equipment with all the auxiliary material and supports for connecting transformers, switchgear, MCCs, and motors, in all types of utility, industrial, and commercial facilities.

General Pricing Instruction – Prepare a layout sketch (if applicable) of the run(s) showing all dimensions in feet and inches, all wall and floor locations and thicknesses and all fittings such as elbows, tees, flanged ends, cable tap boxes, expansion fittings, transformer connections, etc. Add all dimensions together using the center line of the bus and adjust the total to the higher whole foot. Multiply this total by the per foot price as determined by the type (indoor or weatherproof) (aluminum or copper) and the number of poles and any optional accessories (aluminum or steel enclosures, fiberglass or porcelain conductor supports, etc.). To this add the charges for each of the elbows, tees, flanged ends, cable tap boxes, expansion fittings, transformer connections, etc. The sum of these items plus the sum of any optional accessory is the price of the entire bus run. NOTE: Because the bus run is custom designed and built there are no "Complete Device" prices.

**Bus Footage** – The per foot price of the bus may be a combination of several prices depending on the job specifications and requirements. Some of these options are special momentary rating, special housing material and/or finish, special conductor supports, heaters and thermostats, and ground bus. The prices for these options are shown on page 12-16. They should be added to the per foot prices shown on page 12-15.

Weatherproof Bus – Priced the same as indoor. In addition, all weatherproof runs must be equipped with strip heaters to eliminate condensation and, if applicable, a thermostat. A heater should be priced for every seven (7) foot of bus and no more than 20 heaters can be controlled by one thermostat. Also, each bus run should have its own thermostat. The heaters are rated 240 V, 500 watts and operate at 120 V, 125 watts.

Flanged Ends – A flanged end is used to terminate the bus into switchgear, motor control centers, switchboards, or any rigid bus-to-bus connection. It consists of a gasketed equipment flange, up to 1¹-0" of 3⊘3W conductor (3⊘4W as applicable), necessary insulation tapes, and required bolting hardware. If additional conductor length is required, add to the footage price on a per foot basis.

**Cable Tap Box** – A cable tap box includes a gasketed and accessible termination box, lugs, necessary insulation tape (between bus and lugs only), and required bolting hardware. Lug sizes and quantity should be specified by purchaser.

**Transformer/Generator Connection** – This type of termination should be priced whenever the bus is connecting to a transformer, generator, motor, switch or any connection where the bus bars are connecting to porcelain mounted equipment terminals. It will include the same components as a flanged end plus one set of flexible braid type connectors and a terminal box (if required).

**Bushing Box (Weatherhead)** – A bushing box is used on service entrance run where the cable connection to the bus must be made via porcelain bushings. It is comprised of the same components as a transformer connection plus 3 through stud type apparatus bushings, bushing stud connectors (lug pads) and a strip heater.

**Ground Bus** – The bus housing is designed and constructed to provide an electrically continuous ground path. The side rails of the bus housings are capable of carrying the full rated phase current continuously and, under short circuit conditions, are capable of carrying up to 60 kA RMS asymmetrical fault current for 3 seconds. Consequently, a separate ground bus is not necessary unless specified.

**Wall Entrance Seal** – A wall entrance seal consists of a wall throat, wall flange (one side of wall only), and a barrier which prevents air or vapor from passing from one room to another or from outdoors to indoors. It also carries a 1/2 hour fire rating. Consult factory for higher fire ratings. If additional wall flanges are required, they should be added at the prices given on page 12-16.

**Equipment Entrance Seal** – An equipment entrance seal should be priced whenever a barrier is required to prevent the passing of flame and/or gasses between the bus housing and the terminating equipment.

**Expansion Fittings** – An expansion fitting is used to counteract the strain placed on the bus due to the expansion and contraction of the building or the bus itself. One should be priced whenever the bus run crosses a building expansion joint and whenever a straight run of bus exceeds 60 feet.

Flexible Housing (Misalignment) Collar – Required at terminations or wall penetrations when vibrations due to seismic forces may cause damage to the bus. It may also be used to adjust for the "settling" of terminating equipment after installation.

For additional ratings, contact the factory.

**Supporting Steel (Hangers)** – Supports are not included in the "per foot" price of the bus and should be added on the basis of one for every 10 ft. for indoor and one for every 12 ft. for outdoor. Indoor supports are a trapeze type hanger while outdoor supports are a single or double column type support. Consult factory for other type supports.

Hazardous or Seismic Locations - Consult factory for bus runs which are to be installed in a location which is classified as hazardous or in a seismic location.

Standard Construction - The prices on this page are based on standard Power-Zone construction. Page 12-16 should be used to add any options or accessories. Standard construction is as follows:

- Conductor (plating): Copper (silver) or Aluminum (tin)
- Conductor Insulation (5 kV and 15 kV only): epoxy
- Conductor Supports: Glass reinforced polyester blocks
- Housing Material: Extruded Aluminum (1/8-inch Nominal)
- Housing Construction: Totally Enclosed Non-ventilated
- Joint Insulation: EPR and PVC tape
- BIL Rating: 25 kV (600 V), 60 kV (5 kV) and 95 kV (15 kV)
- Momentary (Short Circuit) Rating: 75 kA (600 V) and 60 kA (5 kV, 15 kV)
- Ground Conductor: Housing (100% rated)

Hangers, supports and heater prices not included. See page 12-16 for pricing.

Add 30% for 3Ø4W (half-neutral): add 45% for 3Ø4W (full-neutral).

#### **Space Heaters/Thermostats**

Space heaters must be priced for all weatherproof applications. One heater should be priced for every 7 feet of outdoor bus. If a thermostat is specified to control the heaters, at least one should be priced for each bus run. No more than 20 heaters can be controlled by each thermostat.

Table 12.55:

Description	\$ Price Each
Thermostat	800.00
120 V, 125 W space heater (240 V, 500 W rated)	680.00

#### Hangers/Supports

Hangers and supports are not included in prices on page 12-15. Price one indoor hanger for every 10 feet (maximum) of indoor bus and one outdoor support for every 12 feet (maximum) of outdoor bus (if required).

Table 12.56:

Support Description	Maximum Height	\$ Price Each
Indoor Trapeze Hanger	_	820.00
Outdoor, Single Column Support	6 feet 8 feet 10 feet 12 feet	5709.00 6524.00 7340.00 8155.00
Outdoor, Double Column Support	14 feet 16 feet 18 feet 20 feet 22 feet	14995.00 16495.00 17994.00 19494.00 20993.00

### **Construction Options**

Table 12.57: Momentary (Asymmetrical Short Circuit) Ratings

Voltage Class	Amperage	\$ Price Per Foot ♦ Multiplier			
600 V	75 KA 100 KA 150 KA	Standard 1.25 1.50			
5 kV	60 KA 80 KA 100 KA	Standard 1.05 1.25			
15 kV	60 KA 80 KA 100 KA 150 KA	Standard 1.05 1.25 1.50			

Include base price (page 12-15) plus all options.

#### Table 12.58: Bus Enclosures

Material and Finish	Per Foot \$ Price Adder
Painted Aluminum (1/8" Nominal)	Standard
Painted 14 Gauge Steel	680.00
Painted 11 Gauge Steel	800.00
Unpainted 14 Gauge 304 Stainless Steel	1600.00
Unpainted 14 Gauge 316 Stainless Steel	2160.00

#### **Miscellaneous Terminating Accessories**

Miscellaneous terminating accessory prices should be added only if not already included in the price of the termination (see pricing instruction for further information).

Table 12.59: Bushing Stud Connectors (Lug Pads) ★

_	
Amperage	\$ Price Each
1200 A	5607.00
1600 A	5904.00
2000 A	6315.00
2500 A	7221.00
3000 A	8202.00
4000 A	9528.00

If not included on terminating equipment.

#### Table 12.60: Flexible Connectors

Voltage	\$ Price Per Three Phase Connection ▼							
Class	1200 A	1600 A	2000 A	2500 A	3000 A	4000 A		
600 V 5 kV 15 kV	7550.00 7706.00 7922.00	9300.00	10045.00 10155.00 10265.00	12535.00	16890.00	22440.00		

Add 45% for 3Ø4W (100%) connection. Add 30% for 3Ø4W (50%).

#### Table 12.61: Terminal Boxes

Box Size	11 Gauge Steel	3/16" Aluminum		
3' x 2' x 3'	8350.00	11690.00		
3' x 3' x 4'	9895.00	13853.00		
4' x 3' x 4'	11195.00	15673.00		
4' x 4' x 5'	11935.00	16709.00		
5' x 4' x 5'	12740.00	17836.00		
5' x 5' x 5'	14020.00	19628.00		

#### Table 12.62: Miscellaneous Additions

Description	\$ Price
PVC insulating boots: (optional)▲ Splice (joint) (3Ø3W) Termination (3Ø3W)	2000.00 2000.00
Wall Flange: (optional) (in addition to wall entrance seal) Aluminum 14 Gauge Steel 14 Gauge 304 Stainless Steel 14 Gauge 316 Stainless Steel	1750.00 1250.00 2000.00 2600.00
Optional Conductor Support High Alumina Porcelain■	1150.00
Flexible Housing (Misalignment) Collar (optional)	3560.00

Add 45% for 3Ø4W (100%) connection. Add 30% for 3Ø4W (50%).
